This package consists of:
- PAD2 2135/3, Steady State control unit
- Power/trigger cable, 5m

Specifications

<table>
<thead>
<tr>
<th>Feature</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voltage supply</td>
<td>24VDC ±10%</td>
</tr>
<tr>
<td>Current requirement</td>
<td>max. 1A</td>
</tr>
<tr>
<td>Protection class</td>
<td>IP30</td>
</tr>
<tr>
<td>Operation temperature</td>
<td>0°C ....+65 °C</td>
</tr>
<tr>
<td>Storage temperature</td>
<td>-40°C....+80 °C</td>
</tr>
<tr>
<td>Storage humidity</td>
<td>max. 80%</td>
</tr>
<tr>
<td>Power output</td>
<td>max. 2.5A</td>
</tr>
<tr>
<td>Light intensity</td>
<td>0 to 100%</td>
</tr>
<tr>
<td>Trigger pulselength</td>
<td>max. 5 sec</td>
</tr>
</tbody>
</table>

Warning!
Do not connect to other than 24 V DC

Power/trigger cable

<table>

</tr>
</tbody>
</table>

Trigger input: Optical isolated
Trigger range: 5-24VDC, 20mA

Light head connector:
Pull back the spring-loaded housing before connecting and disconnecting.
Adjustment:
Open the units by unscrewing top cover

Light intensity by external potentiometer:
Turning the external potentiometer anti-clockwise will decrease the light intensity.
The external potentiometer has only 1 turn and by this the intensity can be adjusted from 0 to 100%.
LATAB recommend to reduce the light intensity as much as possible at installation.

Current measurement, J3:
The output current (light intensity) can be measured by connecting a voltmeter to "J3".
100mV is equal to 1A.
For example:
A voltage of 30mV correspond to a current of 300mA.

Trigger configuration

Long flash mode.
This unit can be remotely controlled, ON/OFF, by using the long flash (LF) mode, turning ON and OFF the light by a trigging signal.
As long as a trigger signal is on the light os on and when the trigger signal is of the light is off.

200% light intensity.
At long flash mode it is possible to extend the light intensity to 200%.
At double intensity, 200% (DI) mode, the maximum ON-time is five seconds after which the controller automatically turns OFF the light head for five seconds.
This cooling state is indicated by flashing the Power LED.

Mode setting SW1
SW1-1 = OFF = Normal steady state mode
SW1-1 = ON = Long flash mode
SW1-2 = OFF = 100 % light intensity
SW1-2 = ON = 200 % light intensity

Trigger pulse is neccessary for long flash mode

EEC compatibility:
This product, PAD3 1135/1 follow the EG-directive for EMC-compatibility, 897336, additional 9321/EEG and 93/86//EEG
